MARCELO EPAMINONDAS DE ALMEIDA

Human-in-the-Loop (HITL) Systems Evaluator | Clinical Diagnostics & Behavioral AI Alignment
Spain (Remote) · ma3pa2025@gmail.com · LinkedIn Profile · Substack: The Digital Clinic · GitHub: DAP v1.0.0

10% Spine // 90% Silicon • Human-Trained. Machine-Written.

LANGUAGES

- **Portuguese (Brazil):** Native / Bilingual
- **Spanish:** Full Clinical & Professional Proficiency (13+ years direct clinical diagnosis, patient de-escalation, and high-acuity human interaction in Spain)
- **English:** Full Professional Proficiency (daily production of technical prompt architectures, UI workflows, and telemetry evaluations)

PROFESSIONAL PROFILE

Cross-disciplinary **Human-in-the-Loop (HITL) Systems Evaluator** combining 40 years of observational study in behavioral dynamics and somatic systems (initiated in São Paulo, 1985) with 13+ years of active clinical Traditional Chinese Medicine (TCM) diagnostic practice (Spain, 2013–Present). Academic foundation in Economics (PUC-SP) and Communications (UVA).

Currently active as an AI Data Contributor and Systems Evaluator across multimodal and conversational pipelines, consistently recognized with **top-tier quality scores** for strict guideline adherence.

Specializes in providing clinical containment and qualitative alignment for frontier and open-weights LLMs: red-teaming high-friction edge cases (grief, crisis, acute distress, silence), detecting algorithmic sycophancy, deconstructing "plastic empathy," and engineering machine-usable 4-point rubrics to stabilize conversational models under load.

AI DATA & HITL EVALUATION EXPERIENCE

AI Data Contributor & HITL Evaluator *(Remote / Freelance)*

2025 – Present

- **Multimodal UI & Agentic Validation (English):** Map, validate, and annotate complex step-by-step UI interactions and video workflows under rigid specifications, ensuring high-fidelity ground truth for multimodal agents.
- **Conversational Acoustic & Behavioral Realism (Spanish):** Participate in structured and unscripted dialogues, delivering authentic cadence, prosodic realism, and nuanced situational registers for voice and conversational models.
- **Quality & Rubric Compliance:** Consistently awarded top-tier production quality ratings for zero guideline drift, edge-case identification, and meticulous rubric compliance under production deadlines.
- **AI-Native Workflow:** Fluent use of frontier LLMs as collaborative cognitive instruments to rapidly translate intuitive human clinical observations into formal, structured RLHF evaluations and machine-readable failure taxonomies.

Independent LLM Behavioral Alignment & Safety Research

DAP • DIGITAL CLINIC | 2025 – Present

- Architect and execute structured evaluation sessions ("Rides") across frontier models (Gemini, MiniMax M3, DeepSeek) and local open-weights architectures auditing reasoning breakdowns, attractor basins, and safety boundary anomalies.

- **Originator of the Dào Alignment Protocol (DAP):** An open-source qualitative evaluation framework bridging clinical diagnostic containment (天地人 • Tiān-Dì-Rén) with radical linguistic economy ("Word Coding") to eliminate sycophancy and conversational panic loops.
- **Open-Source Architecture (MIT License):** Published the **Canonical DAP Quartet (`001`–`004`)** and objective 4-point engineering rubrics tagged under `v1.0.0` on GitHub (github.com/ma3pa26/Dao_Alignment_Protocol_DAP).
- **Forensic Telemetry Publishing:** Author and publish post-ride telemetry autopsies, position-correction traces, and case studies on Substack (ma3pa26.substack.com).

CLINICAL & BEHAVIORAL DOMAIN EXPERIENCE

Clinical Practice & Somatic Diagnosis

Independent Practice, Spain | 2013 – Present

- 13+ years of direct clinical practice utilizing Traditional Chinese Medicine diagnostic methodologies.
- High-throughput diagnostic assessment: evaluating non-verbal cues, somatic tension, and emotional states under clinical pressure without premature closure.
- High-acuity patient communication: holding structured, non-judgmental space (The Well) and de-escalating acute human distress.

Behavioral Dynamics & Crisis Intervention Specialist

Field Practice & Continuous Research (Brazil & Spain) | 1985 – Present

- 40 years of continuous study and practical application of human nature, active listening, and psychological de-escalation across diverse socio-cultural environments.
- Deep instinct for identifying behavioral subtext, conversational pacing, and emotional regulation in high-stakes human encounters.

EDUCATION & CONTINUOUS TRAINING

- **Continuous Specialization in Traditional Chinese Medicine & Clinical Diagnosis** — Escuela Neijing, Spain *(2010 – Present)*
- **Bachelor's Degree in Economics** — Pontifícia Universidade Católica de São Paulo (PUC-SP), Brazil – *Focus: Systems analysis, macroeconomic data structures, behavioral economics.*
- **Bachelor's Degree in Communications & Marketing** — Universidade Veiga de Almeida (UVA), Brazil – *Focus: Semantics, structural message design, human interaction models.*
- **Future of AI Certificate** — BlueDot.org *(2025)*
- **AGI Strategy Course** — *(In progress)*

CORE COMPETENCIES

- **HITL Systems Evaluation:** Objective Rubric Architecture (4-Point Engineering Scales), Failure Taxonomy Design, Adversarial Red-Teaming (Grief, Crisis, Silence), Multimodal UI Mapping, Golden Set Maintenance.
- **Clinical & Behavioral Systems:** Somatic Diagnostics, Behavioral Analysis, Acute De-escalation, Ambiguity Containment ("Holding the Gap"), Word Coding.
- **Technical Languages:** Portuguese (Native), Spanish (Full Clinical/Professional), English (Working Technical/Operational).
